## DIGITAL CONTROLLERS

## Specification

### Overview

The DC1000 Series are microprocessor-based controllers designed with a high degree of functionality and reliability at a competitive price. The controllers are available in different formats: 48x48 (1/16 DIN), 48x96 (1/8 DIN), 72x72 (3/16 DIN), 96x96 (1/4 DIN). This controller series is ideal for the control of temperature, humidity, pressure, flow etc. in a variety of applications including:

- Plastic Processing
- Package Machinery
- Painting and coating
- Semiconductor packaging / Testing
- Dryers

### Features

#### • Easy to Configure

Different configuration levels provide easy access to parameters.

#### • Various Control Algorithm

Several different algorithms are available as follows:

- PID or ON/OFF Control
- Heat/Cool Control with 2 PID sets
- Motor Position Control  
(without slidewire feedback)

#### • Auto-Tuning Capability

Advanced auto-tuning function calculates the optimized PID values for your specific control system.

#### • Dual Display and Bar graph

Two large 4 digits display PV, SP and configuration parameters. One 10 LED bar-graph displays the control output (MV), and up to 8 LEDs display the status of the different outputs (Control, Alarm, ...) and also provide indication of the Auto/Manual and programmer states.

#### • Setpoint Programming

Two programs are available with a maximum of 8 segments. The 2 programs can be linked together and perform as a single 16 segment program.

#### • Extended Alarm Capability

Up to three different alarm outputs are available per instrument and 17 kinds of event modes can be assigned to each of alarm output.

#### • Communications

RS232 or RS485 (with ASC II & Modbus RTU Protocol) is optionally available with a maximum communication speed of 38400 bps.

#### • IP65 Front Face Protection

IP65 rated front face permits use in applications where it may be subjected to moisture, dust conditions.

#### • Remote Setpoint Capability

The setpoint can be defined from a remote PLC or other controller.

#### • Manual & Automatic Modes

The control mode can be switched between Automatic and manual by clicking A/M key. (The A/M key is available with DC1020, DC1030 and DC1040)

#### • Global Approvals – CE & cUL

All models are CE certified as a standard, and UL approved version for all models are available optionally.

#### • Parameter Lock

A 4-digit security code prevents any unauthorized changes of parameters or configurations. Parameters can be hidden to user to prevent any mis-configuration of the unit.

Specification		
<b>Program (Optional)</b>		
Program section	No. of programs	2 (Program 1 & Program 2)
	No. of segments	8 segments/1 program
	Segment time	Segment time: Setting by set points(SP) and time (Max. 99hours 59minutes)
	Control output	0~100% When OUT=0%, Program End.
	WAIT function	Rear Wait Time may exceed set time of the particular segment. In this case, remaining time is set as 0 and pending; if the temperature that was measured does not reach target value $\pm$ WAIT set point. It proceeds to the next segment after it is confirmed that temperature reach the range of set point (target value $\pm$ WAIT)
		Setup range: $\pm 0 \sim 1000$ by decimal point.
	Repeat	Repeat / Non-repeat
	Program link	When Program number is 0, Link program 1 and 2.
	Program start	(1) Start from SP=0 (2) Start from PV
	Power Failure	Hot Start / Cold Start
TIME UNIT	Hour. Minute / Minute. Second	
<b>Ramp &amp; Soak</b>		
Slope(Ramp)	Temperature : 0.0 to 99.99 / min	
SOAK TIMER	Max. 99 hours 59 min	
POWER FAILURE	It starts from PV.

## Warranty / Remedy

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Contact your local sales office for warranty information. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace without charge those items it finds defective. The foregoing is Buyer's sole remedy and is **in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose**. Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use.

While we provide application assistance personally, through our literature and the Honeywell web site, it is up to the customer to determine the suitability of the product in the application.
